

# King Edward VI School Science Biology Home Learning Task

Find out about cell structure by going to the BBC Bitesize page here:

<https://www.bbc.co.uk/bitesize/guides/z9hyvcw/revision/3>

**Making a model cell:** Choose a way to make your cell. Some students make it out of modelling clay, some students make it out of food. Be as creative as you can, but if you can't find anything to help you make it, then a big diagram on the inside of a cereal packet, with labels, is fine!

There are some ideas here:

<https://www.wikihow.com/Make-a-Model-Cell#:~:text=A%20cell%20model%20is%20a,create%20a%20fun%2C%20educational%20project.>

Make sure that you decide whether you are going to make a plant or an animal cell, and choose at least four organelles to put inside.

Not sure what an organelle is? Go [here](#)

Make sure you decide whether you are making a plant or an animal cell. They have different organelles (parts of a cell)
