

## Qualification and notional component raw mark grade boundaries November 2020 series

The following qualifications are linear and therefore do not use UMS. For an explanation of how linear qualifications work, check out our blog: [www.ocr.org.uk/blog/view/how-linear-qualifications-and-grade-boundaries-work](http://www.ocr.org.uk/blog/view/how-linear-qualifications-and-grade-boundaries-work)

For all subjects apart from Art and Design, non-exam assessment components were not available in the November 2020 series and so will not contribute to the overall qualification grade. Where non-exam components were not available, they will not be listed within this document.

## Qualification and notional component raw mark grade boundaries November 2020 series

The following qualifications are linear and therefore do not use UMS. For an explanation of how the new linear qualifications work, check out our blog: [www.ocr.org.uk/blog/view/how-linear-qualifications-and-grade-boundaries-work](http://www.ocr.org.uk/blog/view/how-linear-qualifications-and-grade-boundaries-work)

For all subjects apart from Art and Design, non-exam assessment components were not available in the November 2020 series and so will not contribute to the overall qualification grade. Where non-exam components were not available, they will not be listed within this document.
